

De-coding our security 1.6:

How does the eyeWitness app protect information you record?

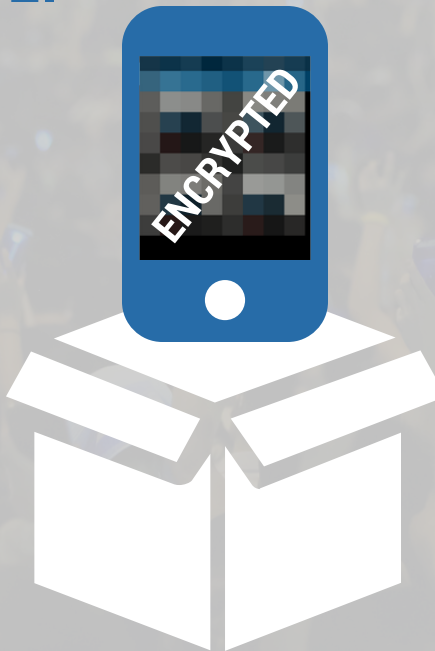

All footage is:

1. Stored in a hidden gallery

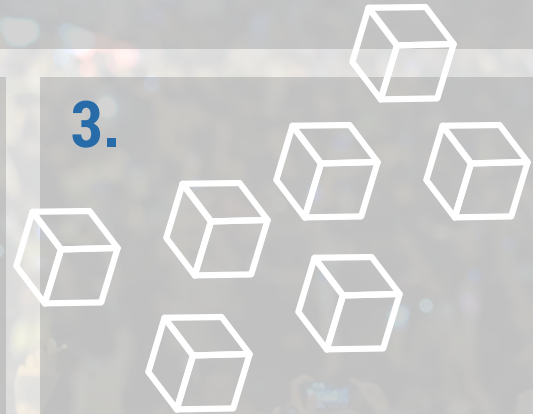

only accessible with a secret pass swipe.

- 2.

- 3.

Transmitted in small packets, to avoid looking suspicious to snoopers.

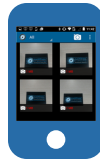

De-coding our security 1.7:

What is the Emergency Delete Button?

1. If in danger...

2.

in just three steps,
from any screen

3.

DELETE all footage
and the app!

**All footage taken and the accompanying metadata will be permanently removed, leaving no visible trace on the device. Once deleted it cannot be retrieved.*

De-coding our security 1.8:

How does eyeWitness use your location data?

What we do

- Only capture location data when you record
- Store all location data encrypted so that it cannot be read

What we don't do

- Communicate information we gather with other apps
- Track your location

Be aware!

- Of other apps collecting location data
- Of where location data is stored elsewhere on your phone
