

# HOW TO POST VERIFIABLE PHOTOS & VIDEOS USING THE EYEWITNESS TO ATROCITIES APP

## RECORD, UPLOAD & SHARE

- 1 Download the “eyeWitness to Atrocities” app from the [Google Play Store](#).
- 2 Record photos/videos/audio with the app.
- 3 Upload a copy of your footage to the secure eyeWitness server to preserve the metadata.
- 4 Share your footage with a notation that it was taken with the eyeWitness to Atrocities app.
- 5 eyeWitness can verify the authenticity of the footage for media outlets or others.

## ADDED BENEFITS

**Reliable metadata:** The app automatically stamps the footage with unmodifiable location, date and time (no internet needed).

**App disguise:** Hide the app on your home screen through different icons.

**Hidden gallery:** Footage is stored in a secure storage area within the app with passcode protection.

**Encryption:** Footage is stored and uploaded in encrypted format.

**Emergency uninstall:** Delete the app in three clicks from the app and app gallery settings (footage not yet uploaded will be lost).

## REMEMBER

- The app is only available for **Android 6.0** or higher.
- Turn on **location services** for the app to record where your footage is taken.
- If you use phone data instead of Wi-Fi, open the app gallery settings and activate **“Upload on cellular”**.
- Where possible, seek the **informed consent** from victims appearing in the footage.
- Provide an **email address** if you would like eyeWitness to notify you if your footage could be used as evidence (optional).
