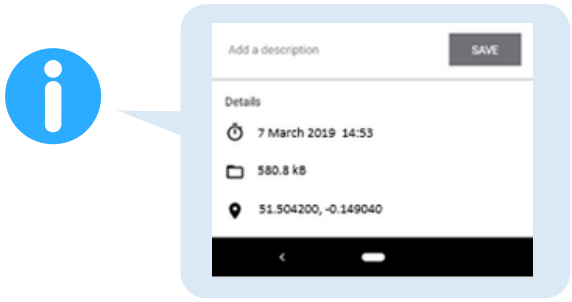
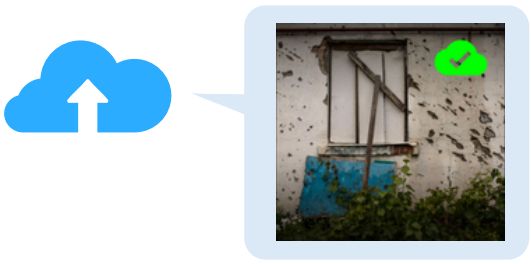
TOP TIPS FOR USING THE EYEWITNESS TO ATROCITIES APP

1. **Turn ON your phone's location services before taking a photo or video with the app**
   to show where the footage was taken.

2. **Open the photo in the app gallery and add a description**
   to provide context
   (access through the information icon).

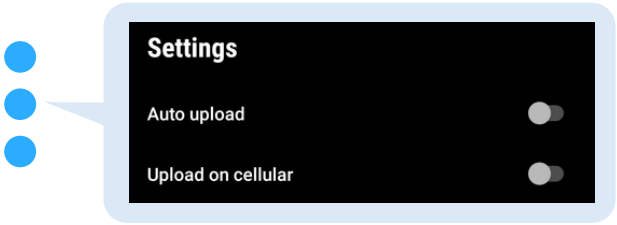


3. **Upload your footage to the secure eyeWitness server**
   to create a verifiable copy.
   eyeWitness will safeguard this copy for future investigations and even seek out opportunities to use it for justice.

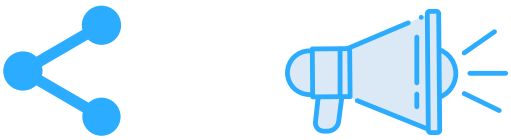


4. **Activate "Upload on cellular"**
   from the app gallery settings if you prefer to use your phone data to upload the footage (otherwise the app will wait for a Wi-Fi connection).

5. **Activate "Auto upload"**
   from the app gallery settings if you prefer your footage to immediately upload to the server when an internet connection is established.



6. **After upload, you can share your footage with your networks and keep a copy.**



Download the app from Google Play Store
